

Australia

NORWELD

**PRODUCT GUIDE
2023**

Norweld Australia has been designing and building aluminium ute trays and canopies for over 50 years! Years of testing and refinement have led us to design, fabricate and install what we believe to be the best tray and canopy packages on the market.

With extensive experience working with the most popular 4x4 models, we offer packages that enhance the capabilities of your vehicle. Norweld's design philosophy is to provide the most attractive, functional and robust trays and canopies on the market.

Norweld offer a wide variety of tray and canopy packages that are designed to suit your needs, and customisation is offered through a number of accessories unique to Norweld.

When the time comes to upgrade to your next vehicle, Norweld trays and canopies may be transferred to your new vehicle using only a few additional parts.

The ability to retain your Norweld tray and canopy ensures you receive long term enjoyment from your purchase, whether it's for work or play.

Whether you need a wind-off canopy on a tray to suit both your work and play needs, or a full time touring set up destined for the most remote locations in Australia, Norweld have a solution to suit your needs.

For more information, contact us on **1300 302 899**, or visit our website at **norweld.com.au**.

THE BUILD PROCESS

TRAYS AND CANOPY BASES

AMAROK, D-MAX, HILUX, RANGER, BT-50, COLORADO, NAVARA, LANDCRUISER

DELUXE TRAY

- Two or four under tray toolboxes
- 1200mm long dust resistant trundle drawer
- 40L or 58L poly water tank
- Sequential LED tail lights (exclusive to Norweld)
- Spare wheel holders integrated into the headboard
- Heavy-duty stainless steel catches and hinges with nylon bushes
- Transferable between most vehicle makes and models allowing you to keep your tray when upgrading to your next vehicle
- 4mm high tensile plate one-piece floor
- Scratch resistant 5mm checker plate side rails
- Individual or one-piece flared mudguards, bolt-on with adjustable mounting
- Extruded sideboards with built-in stiffeners
- 76mm x 38mm x 6mm high tensile aluminium chassis runner
- 76mm x 5mm mandrel-bent tube headboard
- Independently engineered 10mm mounts
- Heavy duty rubber ute mat
- Portal axle mudguard available

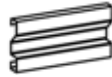

FEATURES

BASIC CANOPIES

NORWELD TRAY OR CANOPY BASE REQUIRED

BASIC

- Two easy access side canopy doors
- Water & dust resistant
- Empty internal layout
- Internal tie down points
- Optional wiring packages available
- Two spare wheel holders on the rear of the canopy
- Optional rear jerry can holder
- Optional shelving and simple accessory installation via Norweld's unistrut
- Dual stage ladder
- Norweld dual locking roller compression locks, central locking upgrade available
- Norweld exclusive extrusions form the canopy's internal box section framework
- Multi-rack roof rack as standard
- Optional 2 pac paint – available for canopy doors or full canopy body
- Weight from 156kg*

*Canopy weights are an approximate, at the time of publication. We recommend having your vehicle weighed after tray fitment.

- Connected to vehicle cranking battery for charging from alternator

TOURER WIRING

- Enerdrive 40Ah DC to DC charger
- 40Ah AC charger
- 125Ah Enerdrive B-tec lithium battery
- Enerdrive 1000W pure sine wave inverter
- Enerdrive E-Pro Plus battery monitor
- Korr lighting tri-colour dimmable door lights
- Aluminium multi-fit battery tray
- 2 x USB sockets, 2 x 12V socket, 1x Engel socket
- 1 x Anderson plug outlet on internal front canopy wall
- External Anderson plug outlet and solar panel input (panel must be unregulated)
- Connected to vehicle cranking battery for charging from alternator

EXTREME WIRING

- Enerdrive 40Ah DC to DC charger
- 60Ah AC charger
- 200Ah Enerdrive B-tec lithium battery
- Enerdrive 2000W pure sine wave inverter
- Simarine display with current monitoring
- Korr lighting tri-colour dimmable door lights
- Aluminium multi-fit battery tray
- External 240V input socket for AC charging
- 2 x USB sockets, 2 x 12V sockets, 1x Engel socket
- 1 x Anderson plug outlet on internal front canopy wall
- External Anderson plug outlet and solar panel input (panel must be unregulated)
- Connected to vehicle cranking battery for charging from alternator

WEEKENDER WIRING

- Redarc 100Ah Goblock – removable for use outside of vehicle
- GoBlock connected to canopy wiring panel
- Redarc Goblock dock fitted to canopy driver side ready for fridge
- Korr lighting tri-colour dimmable door lights
- Aluminium multi-fit battery tray
- 1 x Twin USB Socket, 1 x 12v Socket, 1 x Engel Socket
- 1 x Anderson plug outlets on internal front canopy wall
- External Anderson plug outlet and solar panel input (panel must be unregulated)
- Connected to vehicle cranking battery for charging from alternator

ULTIMATE WIRING

- Redarc manager 30 BMS with AC/DC charging
- Redarc 2000W pure sine wave inverter
- 200Ah Enerdrive B-tec lithium battery
- External 240v input socket for AC charging and inverter AC transfer function
- Korr lighting tri-colour dimmable door lights
- Aluminium multi-fit battery tray
- 2 x USB sockets, 2 x 12V sockets, 1 x Engel socket
- 1 x Anderson plug outlet on internal front canopy wall
- External Anderson plug outlet and solar panel input (panel must be unregulated)
- Connected to vehicle cranking battery for charging from alternator

PLATINUM WIRING

- Redarc Redvision
- TVMS Redarc manager 30 BMS with AC / DC charging
- Redarc 1250 BC-to-DC Charger
- Redarc 2000W pure sine wave inverter
- 2 x 200Ah Redarc lithium battery giving 400Ah of usable power
- Korr lighting tri-colour dimmable door lights
- 2 x Aluminium multi-fit battery trays
- 240V input for charging via shore or generator power
- 2 x USB sockets, 2 x 12V sockets, 1 x Engel socket
- 1 x Anderson plug outlet on internal front canopy wall
- External Anderson plug outlet and solar panel input (panel must be unregulated)
- Connected to vehicle cranking battery for charging from alternator

REDARC WIRING

ACCESSORY UPGRADES

*For all electrical accessories, a compatible wiring package must also be purchased.

CAN I GET A CUSTOM-DESIGNED TRAY OR CANOPY?

The short answer is no. We offer a fixed range of products and sizes which are carefully designed and thoroughly tested. The R&D process typically takes hundreds of hours to ensure the end product meets our high standards to be worthy of the Norweld name and guarantee.

I'M BUYING A NEW VEHICLE – CAN THE DEALER FIT IT?

If the vehicle is getting built and is not in the country we can use our redirection codes to get the vehicle brought to us pre-delivery for install of our products.

The shipping costs will be lower if you live in a non-metro area and we do not charge for in-house fitting at our workshops.

DO THE TRAYS AND CANOPIES ON YOUR WEBSITE LOOK IDENTICAL TO A NEW BUILD?

Norweld products are in a constant state of evolution. Over time we will refine the design for a tray and canopy, usually to increase the strength of the build, or to offer a better solution than existed previously. On occasion the photos in our marketing material may vary slightly from what you will receive. Please contact our sales team if you are unsure about a specific design feature.

HOW DOES THE TRAY GET MOUNTED TO A CAB CHASSIS?

Our mounts bolt to the vehicle and then the tray bolts to the mounts. This eliminates any cracking. Fully welded mounts tend to flex and crack this is why we have developed a process of bolting the mounts to the car and the tray to the mounts.

This is a proven design that has been refined over the years with countless hours of testing and R&D in some of Australia's harshest conditions.

DO YOU POWDER COAT THE TRAYS?

We do not offer powder coating as an option. We prefer paint and we use high quality 2 pac pack systems for the best finish. We do not offer full-colour coding of the trays. You may do this once delivery is taken.

CAN I CHANGE MY TRAY/ CANOPY BETWEEN VEHICLES, DIFFERENT MAKE/MODEL?

Our trays and canopies allow for transfers between vehicles of similar lengths. For instance, a BT-50 package will fit a New Hilux. Similar model sizes listed in the question above. If you keep buying dual cabs they will fit.

CAN YOU RELOCATE FACTORY REVERSE SENSORS/CAMERA/RADAR?

Norweld can relocate the factory fitted tailgate reverse camera, sensors and blindspot monitors in most cases. Some functionality may be altered in a tray conversion from a tub. Please contact the sales team to discuss particular vehicle models.

I HAVE A LANDCRUISER AND AM LOOKING TO INSTALL PORTAL AXLES FROM MARKS 4WD CONVERSIONS. WILL IT FIT WITH YOUR TRAY?

Yes - We have trays on a number of vehicles with this product fitted on the road and have spent a lot of time on the R&D getting to work with our trays and canopies. We also have designed exclusive mud guards to work with the wheel offset and track for a complete package. Chat to the sales team for more information.

WILL I NEED A GVM UPGRADE ON MY VEHICLE?

If you are fitting a tray only it may not be needed. If you are fitting a tray and canopy we highly recommend it. Tray and canopy packages combined with typical 4x4 accessories increase the weight of a vehicle. A GVM upgrade is recommended on most makes and models to ensure trouble-free touring, and for your vehicle to remain legal when loaded. Any reputable 4x4 Accessory or Suspension Store can assist. We list approximate weights of our packages on our brochure and price list.

I HAVE A TRAY ALREADY - WHAT CANOPY PACKAGE CAN I GET?

Norweld can only build canopy packages to suit Norweld trays. We do not design and build canopies for third party trays. For the best-finished look, ergonomics and peace of mind, a complete Norweld tray and canopy package is best. Contact our sales team for more information.

WHAT SIZE TYRES AND WHEELS ARE YOUR SPARE TIRE HOLDERS SET UP FOR?

We have the holders on our trays and canopies set up for standard tire sizes of 265/75/16. We have 40mm adjustment each way on the sizes and our standard tire holders will take up to a 295/75/16 tire with no issues. Please advise our sales team if you are running bigger than this. We offer a kit for 35 inch wheel and tire combos as well.

IS MY CANOPY DUST AND WATER RESISTANT?

Yes. All Norweld canopies are dust and water resistant. A pressurising vent positively pressurises the canopy to prevent dust sucking in. Canopies and toolboxes are fitted with a rubber seal designed to be as watertight as possible.

We are confident rain water will not enter, however, if fully submerged water penetration may occur.

WHAT AWNINGS WILL FIT?

We have brackets to suit the most popular awnings we have purchased and tested. We cannot cater for each and every awning on the market so we choose to work on ensuring a select few work and developed brackets to suit.

HOW DOES YOUR CANOPY SECURE TO YOUR TRAY?

Our canopies are bolted to the tray floor using 6 x M10 bolts.

WHAT WIRING PACKAGES DO YOU OFFER? CAN I SUPPLY MY OWN GEAR TO WIRE IN?

We offer multiple wiring packages. We use Redarc, Narva and Enerdrive components. We have our canopies design based around using our wiring panel fuse boxes and sockets. We will not fit any customer supplied products. Contact our Sales team for more information.

WHY DO I NEED AN INVERTER AND HOW BIG DOES IT NEED TO BE?

Inverters turn your DC power stored in your battery to 240 volt AC power. This allows you to plug in your conventional home appliances, laptops, drone and camera battery chargers etc. The size of the inverter you need depends on what you wish to plug in. Most of the time a device manufacturer will write the power usage in watts on the device. Generally anything with a heating element will require a large inverter which draws a lot of current thus requiring a large capacity high quality battery and charging system. Most coffee machines and induction cooktop require 2000w of continuous power.

AC/DC AND DC/DC CHARGERS, WHAT ARE THESE?

A DC-to-DC charger is designed for taking current from the vehicles alternator and controlling it so it can safely charge the battery and prolong its life. They normally include a solar charging regulator as well.

AC-to-DC chargers are designed for charging your battery from a standard 240 volt wall outlet that you would find in your house or caravan park.

WHAT ARE "LITHIUM" BATTERIES AND WHY ARE THEY BETTER?

LiFeP04 (commonly referred to as Lithium) batteries are an alternative to conventional AGM batteries for dual battery systems.

There are numerous benefits to upgrading your 12 volt wiring system to a lithium battery.

Weight: A 105ah AGM battery weights 29kg. a 125ah Lithium (equivalent Of 200ah AGM) weighs just 15kg.

Performance: They charge faster. can deliver more current for longer (important for inverters) and experience very little voltage drop as the battery discharges. keeping efficiency up.

Longevity: Most conventional AGM's are rated for 300-600 cycles at 50% depth of discharge. Whereas an Enerdrive B-Tec is rated to 2000+ cycles depleting to 80% depth of discharge. Basically the battery will run out of life before you run out of cycles. Current lithium technology has a 5-7 year life span.

WHERE DOES THE BATTERY GET FITTED IN THE CANOPY?

All our internal fitouts have the battery installed behind the drawer next to the fridge area. This is the most practical and safe location. A circuit breaker is fitted close to the battery in the fridge area.
