NORWELD

PRODUCT GUIDE 2023

Norweld has been designing and building aluminum flatbeds and canopies in Australia for over 50 years! Years of testing and refinement have led us to design, fabricate and install what we believe to be the best flatbed and canopy packages on the market.

With extensive experience working with the most popular four wheel drive overlanding models, we offer packages that enhance the capabilities of your vehicle. Norweld's design philosophy is to provide the most attractive, functional and robust flatbeds and canopies on the market.

Norweld's wide variety of flatbed and canopy packages provides you with the ability to build your new flatbed and canopy package specifically catered to your unique individual requirements.

When the time comes to upgrade to your next vehicle, Norweld flatbeds and canopies may be transferred to your new vehicle using only a few additional parts. The ability to retain your Norweld flatbed and canopy ensures you receive long term enjoyment from your purchase, whether it's for work or play.

If you require a wind-off canopy for weekends away or a full-time canopy package with wiring for those longer adventures, Norweld has a package designed to suit your needs.

For more information, visit our website at norweld.com.au/usa

HEAVY DUTY UTE TRAYS AND CANOPIES
norweld.com.au

A woman with blonde hair in a ponytail, wearing a dark jacket and black pants, is sitting in a black folding chair. She is holding a bottle in her right hand and looking out over a landscape. To her left is a truck with a silver metal tray bed. A large, olive-green tarp is stretched over the truck bed and supported by several silver poles, creating a canopy. The truck has a license plate that reads "382-XVU". The background shows a grassy field and a line of trees under a blue sky with some clouds.

FLATBED CANOPIES

NORWELD TRAY OR CANOPY BASE REQUIRED

Heavy Duty Drawers

Easy Slide

Upright Fridge Compatible

Drop Down Ladder

CNC Internals
